17-34455-2	Mostafa, Md. Golam	Mostofa

Project Title:

Online Travel Management

Short Description:

The Goal of the website is to help people navigate and plan for trips around Bangladesh. The website contains locations of popular tourist spots. A user can log in/Register in the website and plan his trip which includes booking hotels, buying tickets for transportation and seeing the information about various tourist spots. The visitors can also contact the hotel and transportation managers to confirm/review their choices. The guides will also be assigned and after reaching tourist spot, the guides will help tourists in locating cottages/ restaurants and also will help in visiting tourist spots.

Users of this Application:

1/ Admin

2/ Tourists

3/ Guides

Goals

1/ To create a web-based application that will help tourists to have an organized journey.

2/ Easier ticket booking can be also possible through this application.

3/ Easier cottage/ restaurant booking.
